Total pellet count:

INSTRUCTIONS:

Take to Kinko's or similar digital print shop on a CD or stick drive, and have this pdf printed on TABLOID paper. Trim off waste below bottom grey line to leave a 11 inch x 11 inch patterning target.

Place a 2 or 3 inch self-adhesive target dot over one of the small grey circles in the center of the target as an aiming point.

Fire for pattern at 35 or 40 yards, then count up the number of pellet hits in each quarter section of the 10 inch circle. Record each section's hit totals in the space provided. Finally, total all four section's hits and record total pellet count.

COST SAVINGS HINTS: If you're on a tight budget, just have ONE print made, then take it out to the copying machines and run them off from that original. I think a tabloid copy only costs about 25 cents at Kinko's. Also, buy a bright orange highlighter marker and fill in one of the aiming circles by hand to really cut costs!
